Summary

Full-Stack Engineer focused on **Voice AI, GenAI products, and automation-connected AI workflows**. Worked on **LiveKit voice agents, Retell/Vapi-style phone agents, STT → LLM → TTS pipelines, agent configuration dashboards, conversation-flow generation tools, CRM integrations, and AWS-backed backend systems**.

Technical Skills

Voice AI / GenAI: LiveKit Agents, Retell AI, Vapi, Twilio-style workflows, OpenAI APIs, Whisper/STT, ElevenLabs/TTS, LangGraph, prompt engineering, tool/function calling, conversation memory, transcript debugging
Languages: TypeScript, JavaScript, Python, Java, SQL, PHP
Frontend / Mobile: React.js, Next.js, React Native, Tailwind CSS, ReactFlow/XYFlow, Chart.js
Backend: Node.js, Express, Python/FastAPI, REST APIs, Webhooks, WebSocket/streaming concepts, API orchestration
Data / Automation: Supabase, PostgreSQL, DynamoDB, MongoDB, MySQL, n8n, GoHighLevel, Google Sheets integrations
Cloud / DevOps: AWS Lambda, API Gateway, EC2, S3, SES, SQS, Cognito, CloudWatch, Amplify, Route 53, Docker, GitHub Actions

Work Experience

Software Engineer, Abstrabit Technologies May 2025 – Present

- Built and worked on production **Voice AI agents using LiveKit Agents**, including real-time audio interaction, STT/LLM/TTS flow, prompt handling, conversation state, and backend-triggered actions.
- Built **AI phone agents** for real estate, spa/service businesses, and barbershop reception flows using **Retell/Vapi-style platforms**, OpenAI, ElevenLabs, and Twilio-style call workflows.
- Designed call flows for **AI receptionists, appointment booking, lead qualification, business-hour logic, transfer rules, fallback handling, outbound/inbound calls**, and transcript-based prompt improvements.
- Built **Call Analytics / Voice Agent dashboard** with Next.js, Supabase, Retell SDK, ReactFlow, Chart.js, including call logs, audio playback, agent config, flowchart view, voices, sync flows, and analytics.
- Connected Voice AI workflows with business systems using **n8n, GoHighLevel, REST APIs, webhooks, OpenAI prompts, SMS/email workflows**, and CRM custom field updates.
- Built backend and cloud workflows using **Node.js, TypeScript, Python, AWS Lambda, API Gateway, EC2, S3, SES, SQS, Cognito, CloudWatch, Amplify**, and PostgreSQL/DynamoDB.

Software Engineer Intern, Finvolv (Kuliza Technologies), Bangalore Nov 2024 – May 2025

- Built workflow-driven features for a low-code FinTech product using **Java, Spring Boot, Vue/Nuxt, Tailwind CSS**, and REST API integrations.
- Worked on onboarding flows, product modules, debugging, code reviews, and clean maintainable feature delivery.

SDE Intern, RedefineAlgo, Noida Jul 2024 – Nov 2024

- Worked across **full-stack web and mobile development**, including **React, React Native, PHP, UI/UX improvements, responsive layouts, search/sort/filter flows**, production fixes, and client-facing feature updates.

Relevant Projects

Conversation Flow Designer / Agent Blueprint Generator Next.js, Python, LangGraph, OpenAI

- Built a GenAI product to generate voice-agent blueprints from business inputs, website/manual sources, and uploaded docs using **Next.js, Supabase, Drizzle, Python/FastAPI, LangGraph, OpenAI, Crawl4AI, and Docling**.
- Implemented multi-phase generation for business research, persona design, intent taxonomy, conversation flows, edge cases, system prompt, and QA test suite.

Retell/Vapi-Like Voice AI Platform Next.js, Supabase, Retell SDK, ReactFlow

- Built a dashboard-style platform for managing voice agents, including **agent configuration, reusable templates, voice/personality settings, flowchart views, call data, transcripts, and analytics**.
- Integrated **Retell SDK, Supabase, API routes, sync flows, charts, audio playback, and webhook-to-database patterns**.

CRM-Connected Voice AI Automations n8n, GHL, OpenAI, Webhooks

- Built AI workflows where conversation outcomes update **CRM fields, lead stages, reminders, follow-ups, internal notifications**, and appointment-related branches.
- Used OpenAI prompts to classify replies and route flows for booking, rescheduling, cancellations, handoffs, fallback, manual review.

Custom Voice AI Agent Pipeline LiveKit Agents, Node.js, TypeScript, OpenAI

- Built a real-time voice-agent flow using **LiveKit Agents** and modular **STT → LLM → TTS** architecture with prompt handling, memory, and backend actions.
- Worked on practical Voice AI concerns like latency, unclear replies, interruption handling, fallback responses, logs, and response quality.

Education

Manipal University Jaipur 2021 – 2025
B.Tech in Computer Science and Engineering CGPA: 8.8/10.0
Delhi Public School (CBSE) 2021
Higher Secondary Certificate Percentage: 94.2
